Subject: Revised Proposed Outpt hospital fee schedule

Importance: High

Lori. Hello! Oops, I forgot to send my out-of-office message, then I remembered this. Can you please e-mail the following to all Consortia workgroup members This is the revised proposed outpt hospital fee schedule that all the hospitals received at the end of October and I meant to send it to Consortia group last week. Thanks!

Outpatient Consortia Workgroup, attached is the revised proposed AHCCCS FFS outpatient hospital fee schedule, as well as the presentation from the October 20 meeting with the AzHHA Hospital workgroup (the pricing examples shared with the hospitals are the same claim pricing examples that were presented to you in previous Consortia meetings).

Please note that the fee schedule file has several tabs, similar to before, intended to split the large file into smaller segments based on service type. The description of the characteristics of the file are listed in the first tab.

And, please note that this fee schedule is still not final, and is subject to change. AHCCCS staff are reviewing the proposed fee schedule rates on various procedures to determine the most appropriate reimbursement for the AHCCCS population. And, AHCCCS is currently meeting with individual hospitals to discuss the estimated impact on individual hospitals.

If you have any questions about this project or legislation defining it, please e-mail us.
